

MULTIPLE CHOICE QUESTIONS

B.4.5. Cardiac Sounds and Murmurs

1. What kind of sound can one detect in the case of an incompetent mitral valve?
 - a. Diastolic sound
 - b. Systolic sound
 - c. Diastolic murmur
 - d. Systolic murmur
 - e. Both diastolic and systolic murmur
2. What kind of sound can one detect in the case of a stenotic mitral valve?
 - a. Diastolic sound
 - b. Systolic sound
 - c. Diastolic murmur
 - d. Systolic murmur
 - e. Both diastolic and systolic murmur
3. What kind of sound can one detect in the case of an incompetent aorta valve?
 - a. Diastolic sound
 - b. Systolic sound
 - c. Diastolic murmur
 - d. Systolic murmur
 - e. Both diastolic and systolic murmur
4. What kind of sound can one detect in the case of a stenotic aorta valve?
 - a. Diastolic sound
 - b. Systolic sound
 - c. Diastolic murmur
 - d. Systolic murmur
 - e. Both diastolic and systolic murmur
5. Which valvular deficiency shows a diamond shape in its murmur?
 - a. Mitral stenosis
 - b. Mitral Regurgitation
 - c. Aortic stenosis
 - d. Aortic regurgitation
 - e. Both Mitral and Aortic regurgitation

Answers:

1. b.
2. a.
3. c.
4. d.
5. c.
